2. Screenshot aplikasi

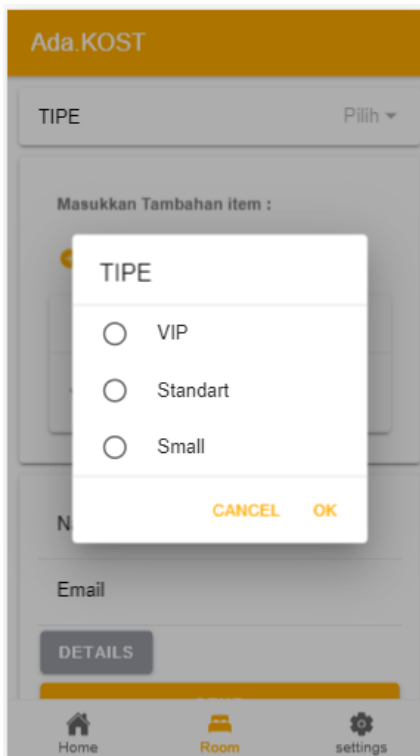

- **Halaman Login**

- **Halaman Home**

- **Halaman Room_tipe**

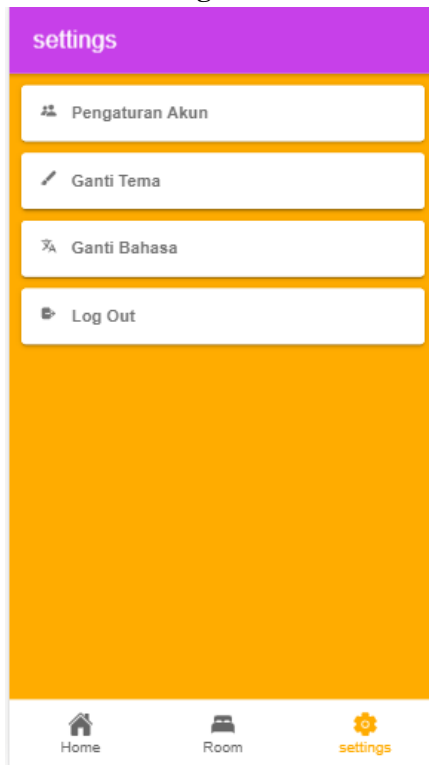

- **Halaman form pesan kamar**

The screenshot shows a mobile app interface for room booking. At the top is an orange header with the text "Ada KOST". Below the header, there are two dropdown menus: "TIPE" and "VIP". Underneath these is a section titled "Masukkan Tambahan item :" with a plus icon. Below this is a dropdown menu labeled "KULKAS" and a text input field containing the number "1". Further down, there are input fields for "Name" (filled with "Nikken Triasa") and "Email" (filled with "nikkentriasa@gmail.com"). Below the email field is a grey button labeled "DETAILS". At the bottom of the screen is a navigation bar with three icons: a house icon labeled "Home", a bed icon labeled "Room" (which is highlighted in orange), and a gear icon labeled "settings".

- **Halaman TambahItem**

The screenshot shows the same mobile app interface as the previous one, but with a modal dialog box open in the center. The dialog box has a white background and a grey border. It contains three radio button options: "AC", "KIPAS", and "KULKAS". At the bottom of the dialog box are two buttons: "CANCEL" and "OK". The background of the app is dimmed, showing the same elements as the previous screenshot, including the orange header "Ada KOST", the dropdown menus, the "Masukkan Tambahan item :" section, the "Name" and "Email" fields, the "DETAILS" button, and the navigation bar at the bottom.

- **Halaman settings**

3. Screenshoot aplikasi hasil implementasi disertai kode

- **Halaman Login**

- ➔ Menampilkan halaman awal dari aplikasi “Ada.KOST”, dimana user sebelum memakai akan di beri instruksi untuk mengisi username dan password.

Login

Ada.

  <ion-card-content>
    <ion-icon name="bed-outline"></ion-icon>
    <!--  -->
    <strong>Small Rp500.000/bln</strong>
  </ion-card-content>
</ion-card>

</ion-content>

```

- **Halaman Room_Tipe**

➔ Kemudian, untuk memilih tipe kamar yang diinginkan, kita berada di halaman Room_Tipe, dimana user dapat dengan mudah memilih tipe kamar, dalam bentuk option. Pemilihan ini, hanya dapat diisi sebanyak satu kali saja.

```
<ion-header [translucent]="true">
  <ion-toolbar color="primary">
    <ion-title>
      Ada.KOST
    </ion-title>
  </ion-toolbar>
</ion-header>

<ion-content>
<!-- Promo 1 <ion-card-header>Jenis Layanan</ion-card-header>-->
<ion-card>
  <ion-item lines="none">
    <ion-label>
      TIPE
    </ion-label>

    <ion-select placeholder="Pilih">
      <ion-select-option value="VIP">VIP</ion-select-option>
      <ion-select-option value="standart">Standart </ion-select-option>
      <ion-select-option value="small">Small</ion-select-option>
    </ion-select>
  </ion-item>
</ion-card>
```

- **Halaman form pesankamar**

➔ Setelah memilih tipe kamar, selanjutnya kita mengisi form yang telah disediakan, seperti nama dan alamat gmail kita.
